

Contents

1	Introduction	6
1.1	Javascript and Frontend	7
1.2	Why Vue?	7
1.3	Who is this book for?	8
1.4	Technologies	8
2	Creating first Vue application	9
3	Methods in Vue	13
4	Getting event inside method	17
5	Listening to keyboard events	20
6	Basic styling in Vue	23
7	Conditions in Vue	28

8	Loops in Vue	31
9	Recipes project	36
10	Vue-cli	55
11	Understanding Vue files	60
12	Data inside components	63
13	Creating custom component	66
14	Styling components	71
15	Passing props to components	74
16	Validating props	80
17	Passing data from child to parent	85
18	Communication between child components	93
19	Communication between child components without parent	98
20	Refs in Vue	103
21	Slots in Vue	106

22	Named slots in Vue	113
23	Building tracks admin project part 1	118
24	Building tracks admin project part 2	128
25	Building tracks admin project part 3	138
26	Working with forms	154
27	Using radio buttons in Vue	159
28	Submitting form	165
29	Custom directives	170
30	Filters	178
31	Computed properties	182
32	Mixins	186
33	CSS Transitions	194
34	CSS animations	200
35	Javascript animations	204
36	Animations for groups	213

37 Working with servers via HTTP	217
38 Global vue-router configuration	226
39 Vue resource	229
40 Vue router	237
41 Deep dive in Vue router	247
41.1 Changing route programmatically	248
41.2 Routes with dynamic parameters	249
41.3 Getting parameters from url	251
41.4 Passing an object in a router-link	253
42 Router features that every project needs	256
42.1 Child routes	257
42.2 Redirect route	259
42.3 Not found route	260
42.4 Transition on switching page	261
42.5 Securing routes	262
43 Getting started with Vuex	265
43.1 Configuring Vuex	266
43.2 Mutations	271
43.3 Getters	273

43.4 Using helpers for getters	275
44 Actions in vuex	280
44.1 Splitting store in several files	284
44.2 Modules in Vuex	287
45 Ticket system project. Add ticket page	296
45.1 Configuring project	297
45.2 Creating add ticket page	301
46 Ticket system project. Tickets list	315
47 Ticket system project. Single ticket page	327
48 Ticket system project. Authentication	337
49 Deploying a Vue application to amazon	354
50 Conclusion	358
